

NEW HORIZON COLLEGE OF ENGINEERING

Autonomous College Permanently Affiliated to VTU, Approved by AICTE & UGC
Accredited by **NAAC** with 'A' Grade, Accredited by **NBA**

The Trust is a Recipient of Prestigious Rajyotsava State Award 2012 Conferred by the Government of Karnataka
Awarded Outstanding Technical Education Institute in Karnataka-2016
Ring Road, Bellandur Post, Near Marathalli, Bangalore -560 103, INDIA

Academic Year 2020-2021
CSE - Computer Science & Engineering
Third and Fourth Semester
Scheme and Syllabus

CONTENTS

1. Vision, Mission and Program Educational Objectives (PEO)	3
2. Program Outcomes (PO) with Graduate Attributes	4
3. Mapping of POs with PEOs	4

SCHEME

4. Scheme of Third Semester B.E	5
5. Scheme of Fourth Semester B.E	6

SYLLABUS

6. Syllabus of Third Semester BE:	7
a) Applied Mathematics-III	8
b) Life Skills for Engineers	11
b) Digital Electronics	13
c) Data Structures using C	15
d) UNIX System Programming	18
e) Digital Electronics Lab	21
f) Data Structures using C Lab	23
g) UNIX System Programming Lab	25
h) Mini Project in C	28
7. Syllabus of Fourth Semester BE:	30
a) Discrete Mathematics and Graph Theory	31
b) Economics for Engineer	34
c) Environmental Science and Awareness	37
d) Object Oriented Programming with JAVA	40
e) ARM Processor	42
f) Computer Organization	44
g) Object Oriented Programming with JAVA Lab	47
h) ARM Processor Lab	50
i) Mini Project in JAVA	52

Appendix A	Outcome Based Education	53
Appendix B	Graduate Parameters as defined by National Board of Accreditation	54
Appendix C	Bloom's Taxonomy	56

VISION

To emerge as a department of eminence in Computer Science and Engineering in serving the Information Technology Industry and the nation by empowering students with a high degree of technical and practical competence.

MISSION

To strengthen the theoretical and practical aspects of the learning process by strongly encouraging a culture of research, innovation and hands-on learning in Computer Science and Engineering.

To encourage long-term interaction between the department and the IT industry, through the involvement of the IT industry in the design of the curriculum and its hands-on implementation.

To widen the awareness of students in professional, ethical, social and environmental dimensions by encouraging their participation in co-curricular and extracurricular activities.

Program Education objectives (PEOs)

PEO1	Develop Proficiency as computer scientists with an ability to solve a wide range of computational problems in industry, government, or other work environments.
PEO2	Attain the ability to adapt quickly to new environments and technologies, assimilate new information, and work in multi-disciplinary areas with a strong focus on innovation and entrepreneurship.
PEO3	Possess the ability to think logically and the capacity to understand technical problems with computational systems.
PEO4	Possess the ability to collaborate as team members and team leaders to facilitate cutting-edge technical solutions for computing systems and thereby providing improved functionality.

PEO to Mission Statement Mapping

Mission Statements	PEO1	PEO2	PEO3	PEO4
To educate graduates and research scholars to be successful, ethical, and effective problem-solvers and life-long learners.	3	-	2	-
Produce versatile Computer Science graduates infused not only with technical skills, but also with innovative and entrepreneurial skills.	-	3	-	-
Prepare graduates for successful careers in Software Industry.	3	3	3	3
Provide a great work and learning environment and treat each other with respect and dignity.	-	-	2	3
To prepare graduates well enough to function as professional computer scientists and computer engineers.	-	3	-	-

Correlation: 3- High, 2-Medium, 1-Low

Program Outcomes (PO) with Graduate Attributes

	Graduate Attributes	Program Outcomes (POs)
1	Engineering Knowledge	PO1: The basic knowledge of Mathematics, Science and Engineering
2	Problem analysis	PO2: An Ability to analyse, formulate and solve engineering problems
3	Design and Development of Solutions	PO3: An Ability to design system, component or product and develop interfaces among subsystems of computing
4	Investigation of Problem	PO4: An Ability to identify, formulate and analyze complex engineering problem and research literature through core subjects of Computer Science.
5	Modern Tool usage	PO5: An Ability to use modern engineering tools and equipments for computing practice
6	Engineer and society	PO6: An Ability to assess societal, health, cultural, safety and legal issues in context of professional practice in Computer Science & Engineering
7	Environment and sustainability	PO7: The broad education to understand the impact of engineering solution in a global, economic, environmental and societal context
8	Ethics	PO8: An understanding of professional and ethical responsibility
9	Individual & team work	PO9: An Ability to work both as individual and team player in achieving a common goal
10	Communication	PO10: To communicate effectively both in written and oral formats with wide range of audiences
11	Project management and finance	PO11: Knowledge of contemporary issues, Management and Finance
12	Lifelong learning	PO12: An Ability to recognize the need and thereby to engage in independent and life-long learning for continued professional and career advancement

Mapping of POs TO PEOs

APPLIED MATHEMATICS – III

Course Code: 19CSE31

L:T:P : 2:1:0

Exam Hours: 03

Credits: 03

CIE Marks : 50

SEE Marks: 50

Course Outcomes: At the end of the Course, the Student will be able to do the following:

CO1	Use appropriate numerical methods to solve algebraic equations and transcendental equations.
CO2	Solve initial value problems using appropriate numerical methods and Evaluate definite integrals numerically.
CO3	Fit a suitable curve by the method of least squares, determine the lines of regression for a set of statistical data, and obtain the external of a function.
CO4	Gain ability to use probability distributions to analyze and solve real time problems.
CO5	Apply the concept of sampling distribution to solve engineering problems.
CO6	Use the concepts to analyze the data to make decision about the hypothesis.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	2	2	-	-	-	1	1	-	2
CO2	3	3	3	2	2	-	-	-	1	1	-	2
CO3	3	3	3	2	2	-	-	-	1	1	-	2
CO4	3	3	3	2	2	-	-	-	1	1	-	2
CO5	3	3	3	2	2	-	-	-	1	1	-	2
CO6	3	3	3	2	2				1	1		2

Module No.	Module Contents	Hours	Co's
1.	Numerical Methods-1: Numerical solution of algebraic and transcendental equations: Regula-falsi method and Newton-Raphson method-Problems, Interpolation: Newton's forward and backward formulae for equal intervals, Newton divided difference and Lagrange's formulae for unequal intervals (without proofs)-Problems.	9L + 2T	CO1
2.	Numerical Methods 2: Numerical solution of ordinary differential equations of first order and of first degree: Modified Euler's method and Runge-Kutta method of fourth-order-Problem Milne's predictor and corrector methods-Problems Numerical integration: Simpson's 1/3 rd rule, Simpson's 3/8 th rule, Weddle's rule (without proofs)-Problems. Applications: Application of numerical integration to velocity of a particle and volume of solids	9L + 2T	CO2

3.	Statistical Methods and Calculus of Variation: Fitting of the curves of the form $y = a + bx$, $y = a + bx + cx^2$, $y = ae^{bx}$, $y = ax^b$, and $y = ab^x$ by the method of least square-Problems, Correlation and Regression lines-Problems Variation of a function and a functional, Variational problems, Euler's equation and Isoperimetric problems Applications: Minimal surface of revolution and Hanging cable	9L + 2T	CO3
4.	Probability distributions: Random variables (discrete and continuous), probability density functions, Discrete Probability distributions: Binomial and Poisson distributions-Problems, Continuous Probability distributions: Exponential and Normal distributions-Problems Joint Probability distributions: Mathematical expectation, correlation, covariance (discrete random variables only)-Problems.	9L + 2T	CO4
5.	Sampling Theory: Sampling, Sampling distributions, test of hypothesis of large samples for means and proportions, confidence limits for means, Student's t-distribution, F-distribution and Chi-square distribution for test of goodness of fit for small samples	9L + 2T	CO5, CO6

LIFE SKILLS FOR ENGINEERS

Course Code : 19HSS322

L:P:T : 3: 0: 0

Exam Hours : 3

Credits : 03

CIE Marks : 50

SEE Marks : 50

Course Outcomes: At the end of the course, the student will be able to:

CO1	Set personal and professional goals
CO2	Develop his critical thinking skills and practice creativity.
CO3	Demonstrate an understanding of personal and professional responsibility
CO4	Apply the concepts of personality development and grooming in real life
CO5	Understand self and work with groups
CO6	Articulate and convey his ideas and thoughts with clarity and focus

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	-	-	-	-	-	2	-	3	3	3	2	3
CO2	-	-	-	-	-	2	-	3	3	3	2	3
CO3	-	-	-	-	-	2	-	3	3	3	2	3
CO4	-	-	-	-	-	2	-	3	3	3	2	3
CO5	-	-	-	-	-	2	-	3	3	3	2	3
CO6	-	-	-	-	-	2	-	3	3	3	2	3

Module No.	Module Contents	Hours	COs
1	Goal Setting: Importance of Goals: Creating SMART goals; Critical Thinking and Problem Solving, Six Thinking Hats, Multiple Intelligences and Mind Mapping	6	CO1, CO2
2	Taking Ownership, Being Responsible and Accountable, Meaning of Ownership, Responsibility and Accountability, Practicing these philosophies in course, career and life, Developing a 'Credible Character Impression about self', Self-Motivation, Developing healthy Self-esteem, Leadership	8	CO3

3	Personality Development and Grooming: Expectations from the industry, building personal presence, corporate grooming, corporate etiquettes, Personal branding and image management	6	CO4
4	Self-Awareness and Self-Management: Emotional Intelligence, Knowing your own self- understanding personality, perception, values and attitude, Interpersonal skills - Knowing others, working well with others, developing the right attitude for work, being proactive and positive	8	CO5
5	Articulation and Group Discussion: Ideas generation, expressing thoughts in a logical flow, presenting views in a group	8	CO6

ENVIRONMENTAL SCIENCE AND AWARENESS

Course Code : 19HSS323
 L : T : P : 1:0:0
 Exam Hours : 02 Hrs

Credits : 0
 CIE Marks : 25
 SEE Marks : 25

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Understand the concepts of environment, ecosystem, biodiversity and its interdependence on human life.
CO2	Develop an insight on types of natural resources and the concept of sustainable development.
CO3	Understand the different control measures of pollution and importance of waste management.
CO4	Think and apply technology as a solution for environment related concerns, keeping in view the different environmental acts and amendments.

Mapping of Course Outcomes to Program Outcomes:

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	1	1	1	1	1	3	3	3	1	1	1	1
CO2	2	1	1	1	1	3	3	3	1	1	1	3
CO3	3	3	3	3	3	3	3	3	3	1	2	3
CO4	3	3	3	3	3	3	3	3	3	1	3	3

Module No.	Content of Module	Hrs	COs
1	Introduction to Environment, Ecosystem and biodiversity: Environment - Components of Environment, Scope and importance of Environmental studies, Ecosystem: Types & Structure of Ecosystem, Energy flow in the ecosystem, Food chains – food webs & ecological pyramids. Biodiversity – Definition, Hot-spots of biodiversity, Threats to biodiversity, Conservation of biodiversity.	05	CO1
2	Natural Resources: Renewable and non-renewable resources – Natural resources and associated problems, Role of an individual in conservation of natural resources, Water conservation, rain water harvesting. Balanced use of resources for sustainable lifestyle – strategies	04	CO2
3	Environmental Pollution: Definition, Causes, effects and control measures of Air Pollution, Water Pollution, Soil Pollution, Marine Pollution, Noise pollution, Thermal Pollution and Nuclear hazards. Role of an individual in prevention of pollution - Waste management – urban and industrial wastes	04	CO3

4	Social Issues and Environment: Environmental ethics – issues and possible solutions, Environment protection act – Air (prevention and Control of pollution) act & Water (prevention and Control of pollution) act, Role of government: Swatch Bharat Abhiyan, National Mission for Clean Ganga (NMCG), River rejuvenation, Role of Non-governmental Organizations (NGOs), Global warming and climate change.	04	CO3 CO4
5	Human Population and Environment: Population growth & explosion, Family welfare programme, Environment and human health, Human rights, Value education, Role of Technology in protecting environment and human health	05	CO4

DIGITAL ELECTRONICS

Course Code : 19CSE33
 L:T:P : 3:0:0
 Exam Hours : 3

Credits : 03
 CIE Marks : 50
 SEE Marks : 50

Course Outcomes: At the end of the Course, the Student will be able to

CO	COURSE OUTCOME
19CSE33.1	Analyze the operation and understand the working of various electronic components and electronic circuits.
19CSE33.2	Implement Boolean function using karnaugh maps and QuineMc-Clusky method.
19CSE33.3	Design and Analyze modular combinatorial logic circuits.
19CSE33.4	Develop Bi-stable elements like flip-flop and use its functionality to understand the sequential circuits and its applications.
19CSE33.5	Design and apply the concepts of state and state transition for the analysis of sequential circuits.
19CSE33.6	Construct Verilog code to implement the combinational and sequential circuits.

Mapping of Course Outcomes to Program Outcomes

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PS01	PS02

Correlation levels: 1-Slight (Low) 2-Moderate (Medium) 3-Substantial (High)

Module No	Module Contents	Hours	COs
1	Introduction to Data Structures: Arrays and Pointers revisited, Sparse matrix, transpose of a sparse matrix, dynamic memory management. Introduction to Data Structures, Classification of Data Structures, Abstract Data Types, Insertion sort, Quick sort, Shell sort, Radix sort.	9	CO1, CO2, CO6
2	Stacks & Queues: Stacks: Definition, Stack representation, Primitive operations on stack, array representation of stacks. Applications of stacks: Recursion, Fibonacci series, Tower of Hanoi problem, Conversion of expressions, Evaluation of postfix expression, Iteration v/s recursion Queues: Definition, Queue representation, Primitive operations on queue, array representation of queues, Circular queue, Priority queue, Double ended queue, Applications of queues.	9	CO3, CO6

3	Linked Lists: Dynamic memory allocation revisited – malloc, calloc, realloc, free, Introduction to linked list, Representation of linked list in memory, primitive operations on linked list, searching a linked list, circular linked list, doubly linked list, header linked list. Applications of linked list: Josephus problem, addition of two long integers, addition of two polynomials, Linked representation of stack, Linked representation of queue.	9	CO4,CO6
4	Trees-I: Introduction, Binary tree – strictly binary tree, complete binary tree, representing binary tree in memory, traversing a binary tree, binary Search tree, insertion and deletion in binary search tree, threaded binary tree. Expression trees, construction of an expression tree from prefix and postfix, Heap tree, creation of heap tree, insertion in heap, Deletion from heap.	9	CO5,CO6
5	Trees-II & Graphs: AVL Trees, Rotations in AVL tree, Insertion and deletion in an AVL tree, Huffman’s algorithm. Introduction to Graph, Graph theory terminologies, sequential representation of a graph, adjacency matrix and path matrix, Warshall’s algorithm, Linked representation of a graph, Operations on a graph, Traversing a graph, Topological sorting	9	CO5,CO6

UNIX SYSTEM PROGRAMMING

Course Code : 19CSE35
 L:T:P : 3:0:0
 Exam Hours : 3

Credits: 03
 CIE Marks: 50
 SEE Marks: 50

Course Outcomes: At the end of the Course, the student will be able to

CO #	COURSE OUTCOME
19CSE35.1	Apply the basic utility commands of UNIX operating system.
19CSE35.2	Use & analyze the various VI editor commands.
19CSE35.3	Analyze the process creation mechanism in Unix and create the various file/directory handling commands.
19CSE35.4	Create various filter commands and regular expression which can be used for quick data retrieval for various societal applications.
19CSE35.5	Design and develop shell scripts for the society with good code of ethics.
19CSE35.6	Formulate awk commands for the benefit of society.

DATA STRUCTURES USING C LAB

Course Code :19CSL37
 L: P: T: S : 0:2:0:0
 Exam Hours : 3

Credits : 02
 CIE Marks : 25
 SEE Marks : 25

Course Outcomes: At the end of the Course, the Student will be able to

CO1	Understand the concept of array data structures, its applications and dynamic memory management
CO2	Implement various sorting algorithms and compare them
CO3	Understand and implement the basic operations of stacks and queues and apply them for problem solving.
CO4	Demonstrate the primitive operations using singly and doubly linked list.
CO5	Learn and implement various operations on trees.
CO6	Implement Graph traversals using DFS and BFS methods.

Mapping of Course Outcomes to Program Outcomes

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	-	-	-	-	-	-	-	-	-	2

CO6	3	3	-	-	3	-	-	-	3	-	-	2

Exp. No	Experiment	Hours
1	Write a program to check whether the given matrix is sparse or not and represent the matrix in sparse representation and determine the transpose of sparse representation.	2
2	Write a C program to sort numbers using insertion sort	2
3	Write a C program to sort numbers using shell sort	2
4	Write a program to sort the numbers using quick sort with recursion.	2
5	a. Write a program to demonstrate Tower of Hanoi problem b. Write a program for Ackermann's function	2
6	Develop a program for STACK that performs following primitive operations: push, pop and display	3
7	Develop a program to convert INFIX notation to POSTFIX	2
8	Develop a program for evaluation of POSTFIX notation.	2
9	Develop a program for QUEUE that performs following primitive operations: insert, delete and display	3

10	Develop a program for CIRCULAR QUEUE that performs following primitive operations: insert, delete and display	3
11	Write a menu driven program to perform the following primitive operations on single linked list A. Create a list with one node B. Insertion at front, rear ,after any given node C .Deletion at front,, rear ,after any given node D. Display	4
12	Develop a program for adding two polynomials.	2
13	Write a Menu driven program to perform the following primitive operations in double linked list A.Insertion B.Deletion C.Display	4
14	Develop a program to traverse a tree using in-order, pre-order and post-order.	4
15	Develop a program to perform insertion, deletion and traversal of a binary search tree	4
16	Develop a program to implement BFS and DFS traversal of graph	4

UNIX SYSTEM PROGRAMMING LAB

Course Code : 19CSL38

L:T:P : 0:0:2

Exam Hours : 3

Credits: 02

CIE Marks: 25

SEE Marks: 25

Course Outcomes: At the end of the Course, the Student will be able to

19CSL38.1	Execute various UNIX commands on a standard UNIX operating system.
19CSL38.2	Apply and change the ownership and file permissions using advanced UNIX commands.
19CSL38.3	Execute C / C++ programs on UNIX making use of UNIX APIs.
19CSL38.4	Understand and work on UNIX system calls, shell programming and AWK on UNIX.

Mapping of Course Outcomes to Program Outcomes

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
19CSL38.1	3	3	-	-	-	-	-	-	-	-	-	-
19CSL38.2	3	3	3	-	-	-	-	-	-	3	3	-
19CSL38.3	3	3	3	-	-	-	-	-	-	3	3	-
19CSL38.4	3	3	3	-	-	-	-	-	-	3	3	-

Exp. No	Experiment	Hours
1	Execution of various general purpose utility commands	2
2	Execution of various file/directory handling commands	2
3	Write a C/C++ POSIX compliant program to check the following limits: (i) No. of clock ticks (ii) Max. no. of child processes (iii) Max. path length (iv) Max. no. of characters in a file name (v) Max. no. of open files/ process	1
4	Write a C/C++ program which demonstrates interprocess communication between a reader process and a writer process. Use mkfifo, open, read, write and close APIs in your program.	1
5	Write a C / C++ program to emulate the unixln command.	2
6	Write a C/C++ program that creates a zombie and then calls system to execute the ps command to verify that the process is zombie.	2
7	Write a C/C++ program to implement the system function.	2
8	Execution of various filter commands	2
9a	Write a shell script to accept a file and check if it is executable. If not make it executable	2
b	Write a shell script which will accept a filename and starting and ending line numbers and displays these lines from given file	

10a	Write a shell script which displays a list of all the files in the current directory to which you have read, write and execute permissions.	2
b	A shell script receives even number of filenames as arguments. Suppose four files are supplied as arguments then the first file should get copied into second, third file into fourth and so on. If odd number of filenames is supplied then no copying should take place and an error message should be displayed.	
11a	Write a shell script which gets executed the moment the user logs in. It should display the message, “ Good Morning”, “ Good Afternoon”, “ Good Evening”, depending upon the time at which the user logs in.	2
b	Write a shell script which accepts any number of arguments and prints them in reverse order. Ex: If file name is test then \$sh test A B C should produce C B A.	
12a	Write scripts to demonstrate built in variables available in AWK	2
b	Write scripts to demonstrate built in functions available in AWK

MINI PROJECT in C

Course Code : 19CSE39
 L:T:P : 0:0:0
 Exam Hours : 03

Credits : 02
 CIE Marks: 25
 SEE Marks: 25

Course Outcomes: At the end of the Course, the Student will be able to

CO #	COURSE OUTCOME
19CSE39.1	Apply the knowledge on the operations of various data structures.
19CSE39.2	Compare and contrast different sorting techniques and its applications.
19CSE39.3	Write and analyze algorithm for the problem statement.
19CSE39.4	Implement operations like searching, insertion, and deletion, traversing mechanism etc. on one or more data structures.
19CSE39.5	Create a software solution for real time application using one or more data structures.
19CSE39.6	Demonstrate their communication skill effectively with technical presentation.

Mapping of Course Outcomes to Program Outcomes

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

The student shall be capable of identifying a problem related to the field of Computer Science and carry out a mini project on the problem defined. Each student is expected to do the mini project individually. The code developed towards the project will be reviewed by a panel of experts during the course of the semester. Plagiarized projects will automatically get an **"F" GRADE** and the student will be liable for further disciplinary action. At the completion of a project the student will submit a project report, which will be evaluated by duly appointed examiner(s).

Sample Mini project includes:

- 1) Tic-Tac-Toe Game
- 2) Quiz Game
- 3) Library Management
- 4) Telecom Billing Management system
- 5) Numerical Method Applications

DISCRETE MATHEMATICS AND GRAPH THEORY

Course Code: 19CSE41

L: T: P : 2:1:0

Exam Hours :03

Credits: 03

CIE Marks: 50

SEE Marks: 50

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Verify the correctness of an argument using propositional logic, predicate logic and truth tables.
CO2	Demonstrate the ability to solve problems using counting techniques and combinatorics in the context of discrete probability.
CO3	Solve problems involving relations and functions.
CO4	Apply Pigeon hole principle to solve real life problems.
CO5	Represent and apply graph theory in solving computer science problems.
CO6	Illustrate the fundamental concepts of trees, connectivity and planarity graphs.

OBJECT ORIENTED PROGRAMMING WITH JAVA

Course Code : 19CSE43
L:T:P : 3:1:0
Exam Hours : 3

Credits : 04
CIE Marks : 50
SEE Marks : 50

Course Outcomes: At the end of the Course, the Student will be able to

19CSE43.1	Understand and apply basic constructs of Java for development of simple programs.
19CSE43.2	Apply OOP principles and proper program structuring to develop programs.
19CSE43.3	Implement polymorphism and inheritance for an application program.
19CSE43.4	Build applications using multithreading and handle exceptions appropriately.
19CSE43.5	Create applications using Java collections.
19CSE43.6	Design and implement programs on I/O functions.

Mapping of Course Outcomes to Program Outcomes

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
19CSE43.1	3	3	-	1	1	-	2	2	3	3	3	3

COMPUTER ORGANIZATION

Course Code : 19CSE45

Credits : 04

L: T: P : 4:0:0

CIE Marks : 50

Exam Hours : 3

SEE Marks : 50

Course Outcomes: At the end of the Course, the Student will be able to:

19CSE45.1	Examine different computer architectures, instruction sets, addressing modes and memory.
19CSE45.2	Design and evaluate circuits to perform basic computer arithmetic operations.
19CSE45.3	Analyze the cache design parameters and evaluate performance.
19CSE45.4	Interpret the working of hardwired and micro-programmed control of the CPU.
19CSE45.5	Comprehend and use internal structure of a processor system and generation of control signals.
19CSE45.6	Apply and analyze instruction pipeline concepts, memory delays and branch delays

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
19CSE45.1	3	3	-	1	1	-	-	-	-	-	-	-

OBJECT ORIENTED PROGRAMMING WITH JAVA LAB

Course Code : 19CSL46

L:T:P : 0:0:2

Exam Hours : 3

Credits : 02

CIE Marks : 25

SEE Marks : 25

Course Outcomes: At the end of the Course, the Student will be able to

19CSL46.1	Apply basic constructs for development of simple Java programs.
19CSL46.2	Apply OOP principles and proper program structuring to develop programs.
19CSL46.3	Implement polymorphism and inheritance for an application program.
19CSL46.4	Build applications using multithreading, swings and handle exceptions appropriately.

Mapping of Course Outcomes to Program Outcomes

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
19CSL46.1	3	3	-	1	1	-	1	2	3	3	3	3
19CSL46.2	3	3	-	1	1	-	1	2	3	3	3	3
19CSL46.3	3	3	-	1	1	-	1	2	3	3	3	3
19CSL46.4	3	3	-	1	1	-	1	2	3	3	3	3

Exp. No	Experiment	Hours	COs
1	Java Program to demonstrate overloading, math class and arrays	4	CO1
2	Write a Java Program to define a class, describe its constructor, overload the Constructors and instantiate its object, and use static members.	4	CO2
3	Write a Java program to demonstrate String class, String Buffer class and its methods	4	CO2
4	Write a Java program to demonstrate nested classes and array of objects		
5	Write a Java Program to implement inheritance and demonstrate use of method overriding	4	CO3
6	Write a Java Program to implement multilevel inheritance by applying various access controls to its data members and methods		
7	Write a program to demonstrate use of implementing interfaces	4	CO3
8	Write a program to demonstrate use of extending interfaces		
9	Write a Java program to implement the concept of importing classes from user defined package and creating packages Write a Java Program to demonstrate dynamic binding, generic programming	4	CO3
10	Write a program to implement the concept of threading by extending Thread Class		
11	Write a program to implement the concept of threading by implementing Runnable Interface	4	CO4
12	Write a java program that implements a multi-thread application that has three threads. First thread generates random integer every 1 second and if the value is even, second thread computes the square of the number and prints. If the value is	4	CO4

	odd, the third thread will print the value of cube of the number.		
13	Write a program to implement the concept of Exception Handling using predefined exception	4	CO4
14	Write a program to implement the concept of Exception Handling by creating user defined exceptions		
15	Write a program to demonstrate File I/O Operations	4	CO5
16	Write a program to demonstrate Array List Class, Linked List Class, TreeSet Class	4	CO5

MINI PROJECT in JAVA

Course Code : 19CSE48
 L:T:P : 0:0:0
 Exam Hours : 03

Credits : 02
 CIE Marks: 25
 SEE Marks: 25

Course Outcomes: At the end of the Course, the Student will be able to

19CSE48.1	Understand the technological needs and/ or societal needs.
19CSE48.2	Design and develop an algorithm by applying JAVA-programming features.
19CSE48.3	Analyze and evaluate the algorithm performance metrics.
19CSE48.4	Test, validate and communicate the identified solutions in a structured way.

Mapping of Course Outcomes to Program Outcomes

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
19CSE48.1	3	3	3	3	3	2	2	2	2	2	2	2

19CSE48.3	3	3	3	3	3	2	2	2	2	2	2	2
19CSE48.4	3	3	3	3	3	2	2	2	2	2	2	2

The student shall be capable of identifying a problem related to the field of Computer Science and carry out a mini project on the problem defined. Each student is expected to do the mini project individually. The code developed towards the project will be reviewed by the panel of experts during the course of the semester. Plagiarized projects will automatically get an **“F” GRADE** and the student will be liable for further disciplinary action. At the completion of a project the student will submit a project report, which will be evaluated by duly appointed examiner(s).
