Project Update - Progress and Next Steps

Achuth G A <achuthga2000@gmail.com>   Wed, May 3, 2023 at 12:19 PM
To: Sadashiv Mulawad <sadashiv.m@synthesis-systems.com>

Dear Sadashiv Mulawad Sir,

I hope this email finds you well. I am writing to provide you with an update on our project - Time Management Systems. I, Achuth G A, from New Horizon College of Engineering, am a part of the team working on the project4.

I am pleased to inform you that we have completed the authentication process using node.js jwt token and have used mongo db as our database. We have also implemented special privileges for the Manager, which means only the Manager can create projects, tasks, or approve timesheets.

To ensure smooth functioning of our project, we have created an E-R diagram for the collection and schemas, which includes 5 collections - User, Project, Task, Timesheet, and Approval. We have also implemented the User, Project, and Task API endpoints with all the necessary validations. We are now in the process of implementing the timesheet feature.

As we progress with the project, we are constantly looking for ways to improve and enhance our project. We would greatly appreciate any insights or suggestions you may have to help us achieve our goal of creating an efficient time management system.

Thank you for your continued support and guidance.

Best regards,
Achuth G A

• The Technical skills track mapped could change at the start or mid-way or even later during the program depending on business demand changes and you would be required to be flexible for this change failing which your internship would be terminated.

• After successful completion of your Internship if there is a business demand which expects you to get skilled on a different skill, you would be expected to get skilled in that demand failing which your Full Time Offer would be cancelled / withdrawn.

• Stipend payment will be done for the prescribed Internship Curriculum period only and no additional payment will be done for any delay in completion.
