

Name of the Event	Alumni Talk
Date	1 st April 2026
Beneficiary	6 th Semester Students
Write Up	<p>The Department of Computer Science and Engineering, in association with the Alumni Association, organised an “Alumni Talk” on 1 April 2026 from 11:00 AM to 12:00 PM. The invited alumni speaker for the event was Ms Divya S, currently working as an Infrastructure and DevOps Engineer at Intel Technology.</p> <p>During the session, the speaker emphasised that deploying artificial intelligence in real-world systems involves far more than merely calling an API. She highlighted the importance of robust data pipelines, model versioning, continuous integration and deployment (CI/CD), and effective monitoring mechanisms.</p> <p>Overall, the talk explored key challenges such as data drift, model degradation, and system-failures were discussed, acknowledging the need for continuous monitoring, logging, and periodic model retraining to ensure sustained performance. The session also introduced students to industry-relevant tools and technologies, including cloud platforms, Docker, Kubernetes, and machine learning lifecycle management tools. Real-world applications such as recommendation systems, fraud detection, and chatbots were shared to illustrate these concepts clearly.</p> <p>The session was highly informative and helped students bridge the gap between theoretical knowledge and practical implementation, offering valuable insights into the complexities of deploying and maintaining AI systems in production environments. More than 40 sixth-semester CSE students attended the session and benefited from the interaction.</p>
