Niranjan J Gowda
Developer Associate
SAP Labs, India
Batch: 2020-2024

Alumni Talk by Mr.Niranjan J Gowda:

TOPICS COVERED:

- What is Github?
- What is cloud?
- Threats.
- Hacking skills.

The transition from college life to the corporate world is an important stage in a student's career. College provides academic knowledge, while the corporate environment requires professional skills, communication, teamwork, and practical understanding. To succeed in the workplace, students must develop both technical and personal skills before entering corporate life.

Things to Learn from College to Corporate

1. Communication Skills

Good communication is essential in the corporate world. Students should learn:

- Professional speaking and writing

- Email etiquette
- Presentation skills
- Active listening

Effective communication helps employees interact confidently with colleagues, clients, and managers.

2. Time Management

In college, students manage assignments and exams, but in corporate life deadlines are stricter. Learning how to:

- Prioritize tasks
- Plan schedules
- Complete work on time is very important for professional success.

3. Technical Skills

Students must improve industry-related technical skills such as:

- Programming
- Data analysis
- Cloud computing
- Software tools
- Digital technologies

Technical knowledge improves employability and career growth.

The journey from college to corporate life requires preparation, confidence, and continuous improvement. Along with academic knowledge, students must develop communication, technical, teamwork, and professional skills. Learning these important qualities helps students adapt easily to corporate culture and achieve long-term career success.
