

ALUMNI TALK – EVENT REPORT

A Day in the Life of an IT/Network Professional

Date	24th September 2026
Time	11:00 AM – 12:00 PM
Venue	A Block – Classroom No. 304 A
Target Participants	5th Semester Students
Speaker	Mr. Nishant Jayant Bhat
Designation	Software Development Engineer
Organization	Unisys India Pvt. Ltd.
Coordinator	Mr. Rahul B, Senior Assistant Professor – CSE
Convener	Dr. Uma Reddy N V, Dean – CSE
Organized by	Alumni Association and Department of Computer Science and Engineering (SF)

The Department of Computer Science and Engineering, in association with the Alumni Association, organized an Alumni Talk on 24th September 2026 from 11:00 AM to 12:00 PM for the 5th Semester students. The session was conducted in A Block, Classroom No. 304 A. The objective of the programme was to provide students with practical exposure to the professional IT environment and help them understand the day-to-day responsibilities, skills, expectations, and career opportunities associated with IT and network-related professions.

Resource Person

The invited speaker for the session was **Mr. Nishant Jayant Bhat**, who is currently working as a Software Development Engineer at Unisys India Pvt. Ltd. As an industry professional, he shared practical perspectives on the transition from academic learning to a professional software career and discussed the expectations of the IT industry from engineering graduates.

Theme of the Session

The session was conducted on the theme “**A Day in the Life of an IT/Network Professional.**” The discussion focused on understanding how an IT professional plans and executes daily technical activities, collaborates with team members, handles project responsibilities, solves technical problems, and continuously develops professional skills. The session helped students connect their classroom learning with real-world industry practices.

Professional Life and Daily Responsibilities

Mr. Nishant explained that the working day of an IT professional involves several activities such as understanding requirements, planning tasks, developing and testing solutions, troubleshooting technical issues, participating in team discussions, documenting work, and meeting project deadlines. He highlighted the importance of effective communication, time management, teamwork, problem-solving ability, and adaptability in successfully handling professional responsibilities.

Technical Skills and Industry Expectations

The speaker emphasized that students should develop strong fundamentals in computer science along with practical technical skills. Programming, software development concepts, computer networks, databases, operating systems, debugging, version control, and familiarity with modern development tools were discussed as useful areas for building an effective technical foundation. Students were encouraged to regularly practice coding and work on practical problems rather than depending only on theoretical knowledge.

Career Development and Continuous Learning

The session highlighted the importance of continuous learning in the rapidly changing IT industry. **Mr. Nishant** encouraged students to keep themselves updated with current technologies, explore relevant tools and frameworks, participate in technical projects, and develop a strong professional portfolio. He also stressed that internships, certifications, project experience, coding practice, and participation in technical activities can help students understand industry requirements and prepare for future employment opportunities.

Interaction with Students

The Alumni Talk was interactive and provided an opportunity for students to clarify their doubts and seek guidance regarding professional life and career preparation. Students discussed areas such as technical skill development, project selection, industry expectations, software development practices, career opportunities, and preparation for entering the IT sector. The interaction enabled students to gain practical insights that complement their academic learning.

Outcome of the Programme

The programme provided students with a clearer understanding of the professional environment in the IT and networking domain. The discussion helped students recognize the importance of technical fundamentals, practical experience, communication, teamwork, problem-solving, and continuous skill enhancement. The session also motivated students to make effective use of their academic years by developing industry-relevant skills and participating in practical and innovative projects.

Conclusion

Overall, the Alumni Talk on “A Day in the Life of an IT/Network Professional” was informative and beneficial for the 5th Semester students. The interaction with **Mr. Nishant Jayant Bhat** provided valuable industry-oriented guidance and helped students understand the responsibilities and expectations of an IT professional. The session served as a bridge between academic learning and professional practice and encouraged students to prepare themselves for successful careers in the IT industry.

Student Participation: The programme was attended by the 5th Semester students of the Department of Computer Science and Engineering, who actively participated in the session and benefited from the industry-oriented insights shared by the resource person.
